

PSHE

Sharlston Vision

At Sharlston, we inspire every child to shine by nurturing their unique talents and fostering a love for learning. Together, as a community, we celebrate success as a shared experience, empowering everyone to reach their full potential.

Subject Vision

We teach Personal, Social and Health Education as a whole-school approach to underpin children's development as people and because we believe that this also supports their learning capacity. We have adopted the Kapow Programme because it offers us a comprehensive, carefully thought-through Scheme of Work which brings consistency and progression to our children's learning in this vital curriculum area. The programme is designed around the statutory Relationships and Health Education objectives and is aligned to the PSHE Association Programmes of Study for PSHE.

Curriculum Drivers

Learning	Citizenship	Communication
<ul style="list-style-type: none"> Children regularly work with partners and groups to improve their independence as well as working collaboratively. Children regularly discuss, act out and display their skills to their peers to deepen engagement, and pride in their learning. Children are exposed to a variety of different situations and scenarios where they can apply their knowledge and skills. 	<ul style="list-style-type: none"> <i>Citizenship</i> is a theme which is developed from the classroom, to our school, to our local community, through to global issues. Children are able to explore and celebrate diversity within their local communities and the wider world, understanding what is 'right/just' and what is 'wrong/unjust'; how and why we care for others and our world and the positive impact that individuals can have. Our lessons include the teaching of the British Values and the 9 Protected Characteristics. <p style="text-align: center;">↓</p>	<ul style="list-style-type: none"> Children are exposed to a wide range of vocabulary to help them understand themselves, their bodies, their health and the world around them. Children will have the opportunity to use their oracy skills throughout their lessons, as they work collaboratively with their peers. There are a wide range of cross-curricular links, especially in subjects such as Science, RE, History and Geography.
